## Our Model

At Eyonic Systems we are dedicated to simplifying technology. Our services are a great value because they are flexible and provide on–demand scalability.

We offer responsive technology services for people and businesses saving them time and money. We build our technology services to help people with any level of experience save time.

Our Carbon Footprint

To lower the environmental impact while still providing stable cloud services, a solar photovoltaic solution was implemented in September 2012 to offset energy utilization.

The amount of power supplied by solar is:

A list of our services include:

- Network Integration

- Drive Destruction

- Cloud Backup

- Vulnerability Assessments

Eyonic Systems Inc.

Managed IT & Cloud Services

Drive Destruction for
Hard Drives (HDDs),
Solid State Drives (SSDs),
& Flash Drives

Keeping an eye on IT essentials.®

Drive Destruction

Destroying old hard drives (HDDs) and solid state drives (SSDs) is an important step towards keeping private information from ending up in the wrong hands.

Who needs to worry about destroying drives?

- Anyone using online banking
- Businesses & Non-Profits
- People who send, receive, or store sensitive data
- Government & Medical Offices

Our service complies with the following standards:

- HIPAA
- NSA
- HITECH

Why Drive Destruction is Important

Data stored on drives is still at risk even when the drive is no longer in use.

Deleting files or formatting a drive does not guarantee the data cannot be recovered later.

Professionally destroying these drives to NSA, HIPAA, and HITECH standards is the only way to be sure the data that once lived on these drives can never be recovered.

The Destruction Process

For Hard Drives (HDD):

- The process consists of degaussing the drives to remove their magnetic charge which is how they hold data, and
- Physically crushing the drives breaking the platters inside

For Solid State Drives (SSD) & Flash Drives:

- The process consists of punching holes through them to break the chips inside

To Get Started:

- Prepay for the number of drives to crush at http://mkt.com/eyonic.
- Ship the drives to us with your receipt number
- After drives are crushed we will email you a certificate of disk destruction

Other Important Info

- Drives are stored securely until crushed
- All drives are destroyed in-house
- In most cases drives are crushed within 1 week

Number of Hard Drives, Solid State Drives, or Flash Drives	Cost
01	$29
02 – 05	$54
06 – 10	$79
11 – 20	$99
21 – 35	$189
36 – 50	$279
Request Pricing For Bulk Quantities	

Pricing is based on the number of drives submitted at a single time.
